

For page 2 what it fixes it shows 24 hours a day in 4 section. Use if you need a low spoon to look at the whole day. Look at and see if you are section 1 ,2 ,3 ,or 4. don't use it if you you need precise using . The math part is not really needed

Example if it is hour 23 it is section 4.

For the math if you want it is

ABCD is for time

$A = (1, 2, 3, 4)$

$B = (1, 2, 3, 4, 5, 6)$

$C = (1, 2)$

$D = (1, 2, 3, 4, 5, 6)$

$\text{Hour} = 6(a-1) + b$

Minute is $30(c-1) + 5d$

But for math lets see for example if i is 15:40. That would be 3322

Instruction you only need to look at that 1 is 1-6 ,2 is 7-12 hours, 3 is 13-18 and 4 is 19-24 .24 is 00.

Algebra Based way to tell time-3			
1,2,3,4,5,6	7,8,9,10,11,12	13,14,15,16,17,18	19,20,21,22,23,00
5,10,15,20,25,30		,35,40,45,50,55,00	
	hours		minute
1	1-6	1	5-30
2	7-12		
3	13-18	2	35-00
4	19-00		
  			

A =(1,2,3,4)

B= (1,2,3,4,5,6)

C=(1,2)

D=(1,2,3,4,5,6)

Hour =6(a-1)+b

Minute is 30(c-1)+5d
