

I ran out of spoons writing instructions, so I used AI to help explain page 7. Plus this one is one is hard to but important to explain.

How to use page 7

This page has 9 time systems on one page.

Do NOT use all 9 at once.

Pick only ONE system that gives enough information for what you need right now.

The reason they are on one page is so you do not need to flip pages during school, work, or low energy moments.

Start simple:

1. Need rough time → use the 6-hour group.
2. Need where you are in the day → use the 24-hour section.
3. Need the next short time step → use the 15-minute / 45-minute anchor.
4. Need more detail → use the grid or clock.
5. Ignore the rest.

You can switch systems later.

This page is a tool belt, not a test.

Look at one at a time.

Instructions

There is 9 system in one page. There is two of the reason there is 9 system in one page and not split up is that in school or work you won't have time to flip through the pages

There is 3 pages. They are duplicated but one small change for the next one

Why i made this on one page is that it fits into a wallet I think if you fold it.

The page before this one show how to use it.

How it works .

Lets go left to right

1 12 hour clock

2. 15 minute increments

3. 12 hour clock but you can convert it to be 24 hous

4. 24 hour clock

5. 6 hour group

6. 3 by 4 grid

7 3 by 2 grid

8. marking every 45 minute.

9 24 hour but in line

Oh and you can use a packing tape to laminate it so it last longer.

12 hour clock	15 minute /12/24 hours	24 hours clock	6 hour unit
3 by 4 grid	2 by 3 grid	anchor	24 hour in 3 unit grid

Breakdown of it

\. /
 (: D))---
 /\

12 hour clock	15 minute	24 hours clock	6 hour unit
3 by 4 grid	2 by 3 grid	Anchor /12/24 hours	24 hour in 3 unit grid

B

They are both the same thing just one save more space and the () seprate even and odd. Left side is hour . Right side is minute but how analog clocks is
