

mental stimming

for situations where you can't physically move like driving . But you need to stim here is something for you

This is so you can mentally stim without any object if you remember this format

How it works you imagine the circle moving like this . You can imagine the circle moving the other way.

How it works is that you pop it like it pop up and down like a soda lid button

This one you imagine it goes down

Imagine this on seesaw and you push on and the other up
